

RAHUL SINGH PARIHAR

SDET • QA Manual/ Automation Engineer

Pithoragarh, Uttarakhand • +91 8126037266 • parihar11rahul@gmail.com • github.com/rahul-0707 • linkedin.com/in/rahul-singh-parihar

PROFESSIONAL SUMMARY

Results-driven SDET and QA Automation Engineer with hands-on experience in building automation frameworks using Python, Playwright, and Pytest. Currently contributing to Vounce.ai — an AI-native landing page generation platform — handling end-to-end QA including staging environments, integration testing with GA4, Zoho Forms, HubSpot, and Microsoft Clarity. Completed MCA with a final project in AI-powered QA tooling. Targeting full-time SDET / QA Automation roles.

PROFESSIONAL EXPERIENCE

Software Development Engineer in Test (SDET)

February 2025 – Present

FRD Studio | Gurugram, India

- ▶ Driving end-to-end QA for Vounce.ai, an AI-native landing page generation platform — covering functional, regression, and integration testing post-launch (June 2026).
- ▶ Built and maintained automation frameworks using Python, Playwright, and Pytest; implemented 48+ test cases covering third-party integrations (GA4, HubSpot, Zoho Forms, Microsoft Clarity).
- ▶ Designed and executed a comprehensive Staging QA process including test plan documentation, SVG visual maps, and Excel-based test trackers.
- ▶ Performed prompt engineering for Vounce AI to optimize AI-generated landing page quality and consistency.
- ▶ Collaborated with developers via structured daily Slack updates, streamlining defect triage and resolution cycles.
- ▶ Performed manual and regression testing across full-stack scalable systems; analyzed QA logs for root cause analysis (RCA).

PROJECTS

BugSense AI — Automated QA Log Summarizer — Python, Google Gemini API, Streamlit, NLP

Live: bug-summarizer.streamlit.app | GitHub: github.com/rahul-0707/QA-Bug-Summarizer

- ▶ Engineered an AI-driven web application for automated QA log summarization and root cause analysis (RCA).
- ▶ Integrated Google Gemini API for intelligent log parsing; built interactive Streamlit UI with real-time insights from complex system logs.
- ▶ Selected as MCA final project; received strong academic evaluation for practical AI application in QA workflows.

Mental Health Check-in (NLP-based Web App) — Python, Flask, React, SQLite

GitHub: github.com/rahul-0707/mental-health-app

- ▶ Developed a journaling application enabling users to track emotions via NLP analysis.
- ▶ Implemented secure data storage using SQLite and built a responsive UI with React(vibe coded).

Railway Reservation System — C, File-handling

GitHub: github.com/rahul-0707/Railway-reservation-using-C-lang

- ▶ Built a file-based database system in C for managing real-time bookings, cancellations, and data persistence with cross-record consistency.

TECHNICAL SKILLS

Testing	Manual Testing, Automation Testing, Regression Testing, Integration Testing, API Testing, UAT
Frameworks	Playwright, Pytest, Test Assurance, CI/CD Integration
Languages	Python, JavaScript, SQL, C, HTML5
Databases	SQLite, SQL, Database Design, Normalization, Secure Data Management
Tools	Git/GitHub, GitHub Actions, Postman, Streamlit, Agile/Scrum, SDLC
AI/ML	Google Gemini API, Claude API, NLP, Prompt Engineering
Web/UI	Tailwind CSS, Responsive Design

EDUCATION

Master of Computer Applications (MCA)

Graphic Era Hill University, Dehradun

2024 – 2026

Bachelor of Arts (BA)

SSJU, Pithoragarh

CERTIFICATIONS

- ▶ Data Structures & Algorithms in Python
- ▶ Agile Testing- LinkedIn
- ▶ Project Management Foundation - LinkedIn
- ▶ Java Certified Foundations Associate — Skillsoft
- ▶ Agile Project Management — HP LIFE
- ▶ Cyber Job Simulation — Deloitte Australia
- ▶ Software Engineering Job Simulation — Wells Fargo
